

01 IN SHORT

Hi. My name is Nikita.
I want to grow with a *strong automotive studio*.

I'm drawn to the aesthetics of the automotive industry, its attention to detail, and its high standards of execution. I'm a petrolhead, I genuinely love cars, and I want to work with a team where quality is not treated as a compromise, but as the standard.

02 • MINDSET

Mature approach

I understand the cost of mistakes and the value of other people's time. If I take on a task, I try to do it cleanly, carefully, and without constant supervision. I know how to ask questions, work through technical information, and find a practical solution.

03 • HANDS

Hands-on work

I enjoy working with tools, materials, and equipment. I keep a tidy workspace, pay attention to detail, and I'm not afraid of routine or dirty work. For me, it's important not just to finish a task, but to do it well.

04 • PACE

Fast learner

I want to learn the craft seriously. I'm ready to start in a helper position, support the team, gain experience, and grow through practice.

If you need someone reliable, I'd be glad to introduce myself in person and show how I work.
